ABOUT ME

I am M. Zainul Qirom, an Informatics Engineering graduate with a strong background in software development and computer networks. With hands-on experience as a Frontend Developer, I specialize in building responsive and user-friendly applications using modern web technologies. My foundation in networking strengthens my problem-solving skills, enabling me to understand system performance and optimize solutions from both software and infrastructure perspectives. I am passionate about continuous learning and actively developing both technical and interpersonal skills. I am seeking opportunities as a Frontend or Full Stack Developer, while remaining open to other roles in the technology sector where I can contribute to innovative and impactful projects.

Programming	Typescript, Java, JavaScript, Python, PHP
Database	PostgreSQL, MySQL, Realtime Database (Firebase)
Framework	ReactJS, React Typescript, Laravel, NodeJs, NextJs, ExpressJs
Tools	Git, GitHub, Gitlab, Firebase, Figma, Ms. Office, Visio, Matlab
Soft Skill	Problem Solving, Analytics, Critical Thinking, Teamwork
OS	Linux, Windows
Other	Unit Testing, Nginx
Infra/Networking	Biometric System, Router, Switch, TCP/IP, DHCP, DNS

EXPERIENCE

Skyrain Studio <i>Software Engineer</i>	Bojonegoro <i>June 2022 – Present</i>
- Developed and maintained scalable web applications using TypeScript, React, Next.js, and Tailwind CSS, ensuring responsive and user-friendly UI/UX. - Implemented state management with Redux and optimized application performance through component slicing and clean architecture principles. - Built and integrated APIs with Firebase for authentication, real-time data, and cloud storage, enabling seamless backend connectivity. - Wrote and maintained unit tests using Jest, improving code reliability and reducing bugs in production. - Applied ESLint and best coding practices to maintain a clean, consistent, and maintainable codebase. - Designed and prototyped user interfaces with Figma, collaborating effectively with UI/UX designers to translate ideas into functional features. - Worked with SQL databases for structured data management and complex queries to support business requirements. - Developed and maintained RESTful APIs using Express.js, enabling efficient communication between frontend and backend services. - Integrated SQL databases with backend services for CRUD operations and data processing. - Implemented authentication & authorization flows (JWT/Firebase Auth) to enhance application security. - Optimized API performance through query optimization, middleware usage, and error handling. - Implemented localStorage and sessionStorage for efficient client-side data caching, reducing unnecessary API calls and improving app responsiveness. - Optimized web performance by applying techniques such as code splitting, lazy loading, image optimization, and caching strategies, reducing page load time and enhancing user experience. - Monitored and analyzed app performance using browser DevTools and Lighthouse, implementing improvements that boosted overall speed and reliability.	

EDUCATION

Nahdlatul Ulama Sunan Giri University <i>Bachelor's Degree in Informatics Engineering</i>	Bojonegoro <i>September 2019 - September 2023</i>
GPA: 3.73/4.00. Final Thesis: Klasifikasi citra buah Tomat dengan ekstraksi Local Binary pattern dan Hue Saturation Value dengan menggunakan Metode K-Nearest Neighbors (KNN)	

CERTIFICATION

Git Learn <i>Version Control</i>	Simplilearn <i>Juni 2023</i>
Proficient in Git version control, including branching, merging, stashing, rebasing, cloning, reverting, pushing, pulling, deleting, ignoring, renaming, tracking issues, resolving conflicts, collaborating, and managing files.	

ORGANIZATION

Ikatan Pelajar Nahdlatul Ulama <i>Active Member</i>	Bojonegoro <i>January 2020 - April 2022</i>
